

## **Disclaimer – For Healthcare Professionals Only**

The content on this website is intended solely for healthcare professionals (specifically physicians, laboratory professionals, and other individuals authorized to use in vitro diagnostic devices) for professional informational purposes.

The information provided here does not constitute patient education material and is not intended to inform lay users. The content does not replace clinical decision-making, the professional judgment of a healthcare professional with appropriate qualifications, or official guidelines applicable to the specific diagnostic or therapeutic situation.

The in vitro diagnostic devices (IVDs) presented on this website may only be used in strict compliance with the applicable Instructions for Use (IFU) and applicable national and European Union legislation. The performance characteristics and indications of the products may only be interpreted within the scope defined in the officially approved documentation.

The information on this website is not to be considered a diagnostic or therapeutic recommendation and should not be used to make independent clinical decisions. The interpretation of laboratory results is always the responsibility of a qualified healthcare professional in the context of the complete clinical picture.

The provider strives to ensure that the information is accurate and up-to-date; however, it assumes no liability for any direct or indirect damages resulting from any omissions, inaccuracies, or the improper use of the information.
